

ISG Celebrates the Opening of Sara Village School and Completion of DBGS's New Physical Education Facility – September 2010

At ISG, our success is illustrated by the continued growth of our diverse student body – now over 3,200 strong. With this growth comes the need for investments in infrastructure and technology.

The 2010-2011 academic year got off to a successful start with the completion of two major infrastructure enhancements for our British curriculum schools. Below is a brief paragraph highlighting the opening of Sara Village School on the purpose-built BAE Systems compound, and realization of Dhahran British Grammar School's "upper shade" project which features a new gymnasium and several new classrooms.

In the coming year, ISG looks forward to continued progress on numerous additional planning initiatives and facility investments across the District, including the future inauguration of a new Yanbu International School campus, new classrooms for ISG Jubail and ground breaking for a new ISG Dammam campus.

DBGS Upper Shade Project Completed

Dhahran British Grammar School (DBGS) began an important project last year to remodel the campus area known as the 'upper shade'. For most of last year, the facility was not in use by students due to the work being done.

We are pleased that DBGS has begun to use the upper shade again ... but now as a proper gymnasium!

The remodeled facility, a wonderful addition for DBGS students on ISG's Dhahran campus, will be used daily and will enhance physical education programming, sports practices, and tournaments. In conjunction with this new development, two new classrooms are also planned for completion during this school year.

The Upper Shade Project is the newest development in ISG's on-going effort to improve DBGS facilities on the Dhahran campus.

Congratulations DBGS. ISG wishes to express our appreciation to our staff, students and parents for their involvement and support throughout the planning and construction process.

Sara Village School – ISG’s Seventh School Opens Its Doors

BAE Systems and International Schools Group (ISG) marked the opening of the new Sara Village School on August 24, 2010.

After about 9 months of intense planning, the new school was welcomed by adoring students and parents at a blue-ribbon cutting ceremony.

Sara Village School is a welcome addition to International Schools Group. The school offers programmes up to Year 6 for children of BAE Systems employees. SVS is fully staffed and resourced and will continue to develop as the number of students increases from the opening enrollment of currently 100 students, with a maximum capacity of approximately 160.

ISG’s newest member, SVS is the result of a partnership with BAE Systems. Thanks to BAE Systems for the beautiful, new facility which is equipped with state-of-the art teaching technology.

Congratulations to all involved.
